**Defrosters for the
back glass of trucks**

Rear Window Defroster Kit

Clear View defrosters are aftermarket rear window defrosters for virtually all makes and models of trucks including Ford, Chevrolet and CJDR. Clear View truck defrosters are a complete installation kit, simple to install, and provide factory defroster performance with an attractive finished look.

Clear View Pickup Truck Rear Defrosters

The defroster elements come on pre-spaced rolls for perfect alignment and are trimmed during installation to the window size for a custom fit. The heating elements bond aggressively to the glass and are similar in color to factory elements. Also included is a ThermaSync Controller, LED Switch, a wire harness and installation kit.

Clear View defrosters are complete ready-to-install units that include a ThermaSync defroster timer control and activation switch.

Mounting & Installation Options

Clear View Aftermarket Defrosters are available as a full installation kit which includes the copper wire grids, wire harness, fuse, switch mounting plate, power tap, wire ties, surface cleaner/adhesion promoter

Technical

Rear Defroster Layout

Clear View defroster elements are laid out in series and parallel to deliver the resistance needed for optimal window heating.

Tab Connector Location

The Clear View layout requires a connection tab in the upper left and lower right of the defroster.

Clear View Truck Rear Window Defroster Sizes

1209-4567-PIC - Complete Kit

1209-4567-PIC-STK - Stick Kit

11.25 inches in height with a minimum length of 45 inches, maximum 67.

1212-4567-PIC - Complete Kit

1212-4567-PIC-STK - Stick Kit

15 inches in height with a minimum length of 45 inches, maximum 67.

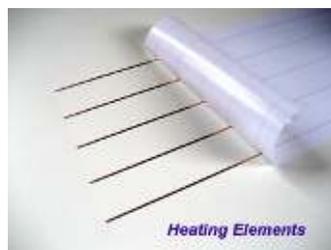

Available in 12 and 24 volts. Amps in the 10-20 range.

Timer Options

Standard automatic off timing is set to 20 minutes for a standard 2712 controller. Upgrade to the 2812 controller for variable times; can be set to time out from 10-160 minutes or can be left on indefinitely.

Application

The heating elements come on pre-spaced rolls which are trimmed by the end user for a custom fit. The self-adhesive heating elements bond directly to the glass and connect to the defroster's side buss bars. A cover is then applied to the buss bars for a finished factory appearance.

Roll on the defroster elements.

What is included

Defrosters

Complete Clear View defroster elements and buss bars.

2712 ThermaSync Defroster Control

The timer control which includes an LED defroster indicator switch and are configured at the factory prior to shipment.

Wire Harness

A complete wire harness is included with color coded connectors for easy assembly.

Installation Pack

Includes the fuse and holder, power taps, wire ties, under dash switch mount, extra connectors and adhesion promoter glass cleaner.

Options*

Upgrading to the 2812 controller can be adjusted for variable time and modulated power to the defroster from 3% up to 100% and other timer options. This feature allows for custom install options.

Stick Kits

Clear View defrosters are available as Stick Kits containing all the parts that stick to the windows, without the wiring, for use with cars with existing defroster wiring.

1209-4567-PIC-STK - Stick Kit

1212-4567-PIC-STK - Stick Kit

One Switch, Multiple Defrosters

A single switch can activate several defrosters using the 2730 Switch Boss. This network control is good for cabs and other applications that require several defrosters to be activated from a single switch, such as heated rearview mirrors.

ThermaSync Switch Boss activates 2-4 defrosters from a single switch.

Order at www.frostfighter.com

* Modulation and timing options require 2812/2824 ThermaSync Controls

Not for use on segmented or sliding back windows.

Frost Fighter and ThermaSync are registered Trademarks of The PipeKnife Co.
